

OVERHEAD PROJECTOR

The controller to the screen and the projector are either on the window sill or, preferably, kept in the drawer within the black sound system cabinet.

To open the screen, use remote controller pointed at the top left hand side of the screen (it is quite directionally sensitive)

Screen up

Screen Stop

Screen Down

The projector system is a plug and play
Use blue button on controller to switch on projector. It will display the source options available

Plug your equipment- Lap top/video etc. into the panel on the side wall.

Note we may not have all the leads needed
