Floor Plan

Please read the Fire Safety Information on the following page, and ensure those using the building are aware of this information.

Huskar Community Rooms

Fire Safety Information

As the person responsible for hiring the Silkstone Community Centre, it is your responsibility to ensure that all building users within your care or organisation are aware of what actions to take in the event of a fire.

The plan within the below shows the location of all the building exits, smoke/heat detectors, alarms, firefighting equipment, manual call points, the fire control panel and the first aid kit.

On arrival at the Huskar Rooms check the fire alarm control panel to confirm that no faults are showing, any anomalies should be immediately reported to the Building Manager (07867 788223).

Always ensure:

1) All electrical appliances are switched off after use.
2) All radiators are kept clear of obstructions.
3) No obstructions are placed in front of fire doors or in escape routes
4) All doors are kept closed when access is not required.
5) No smoking is permitted anywhere in the building
6) No flammable liquids or gas canisters are stored within the SCC

Actions to take on discovering a fire:

1) Raised the alarm via one of the manual call points
2) Carryout a sweep of the building, including the toilets if safe to do so
3) Ensure that all persons evacuate the building via the nearest escape route
4) Call the emergency services on 999
5) Assemble all persons from the building at the assemble point by the gate at the base of the track to the sports pavilion
