

### **Mountfield Village Hall - dimensions**

The hall, excl kitchen etc, is approximately 11.4m long and 7m wide and 4m high. However the ceiling mounted projector, glitterball and the 2 lowest spotlights are just over 3m from floor, so this reduced height needs to be taken into account for any tall equipment brought into the centre of the hall. There are 3 infrared heating panels on the lower ceiling on either side of the hall. All items must be kept at least 2m away from the infrared panels. See photo below.

### **Bouncy castle use**

The hall accepts the use of bouncy castles and similar equipment. The Hirer must ensure that any equipment brought by them to the premises (including outside grounds) and used there, shall be safe and in good working order and be used in a safe manner in accordance with relevant Health and Safety legislation. Equipment such as bouncy castles must be fully insured and risk assessed by the hirer and/or equipment supplier. Equipment must be properly supervised at all times by a responsible adult.

There are 3 infrared heating panels on the lower ceiling on either side of the hall. All items must be kept at least 2m away from the infrared panels. Bouncy castles need to be positioned centrally in the hall to be as far away from the infrared heaters as possible.

The Committee shall not be liable for any loss or damage of whatever nature which may result from the hirer not complying with these conditions, whose activities are outside of the Committee's own insurance policies.

See Terms and Conditions of Hire document, specifically item 7.
