CAR PARKING & UNLOADING

- Unloading area and car parking in marked lay-bys outside hall.
- Additional parking at the nearby recreation ground
- On-street parking on Links Lane and The Fairway.
- Wide access gate to rear garden

OUTSIDE GRASSED AREA

- Large rear garden area with fencing
- Paved area suitable for BBQs
- Outdoor lighting along the rear of the building
- We have an installation of posts to support netting above the entire garden, as a safety feature, designed to prevent errant balls from the neighbouring golf course entering the garden
- If you are looking to use the garden for bouncy castle, you will need to ensure that any inflatable fits within the installed posts. We suggest you ensure the supplier is aware of any restrictions prior to booking with them.
- A small bouncy castle should fit between the centre posts and those nearest the building and must be positioned with the entrance and exit facing away from the paved area. The height restriction for any inflatable must be less than the lowest point of the netting in this position, which is 11' 5" (3.5m)
- The posts are 21' 6" (6.55m) apart widthways and 15' 7" (4.74m) lengthways. The posts range in height from 13' 1" (4m) nearest the building, 11' 5" (3.5m) at the centre point and 9' 10" (3m) along the rear fence line
- For safety the lower sections of the centre, rear and side posts are padded and the padding is 120cm high.
