

Use of Bouncy Castles

As part of an agreed hire of the church halls the church allows the use of professionally provided bouncy castles for use at children's parties under the following conditions:

- They are specifically the indoor type
- They are of the 'castle' type only - eg: inflated bouncy floor area surrounded by 3 inflated walls - no inflated slides allowed.
- That they comply with BS EN 14960
- All electrical equipment has been PAT tested.
- They are provided by a professional hire company who certify the above
- It is accepted that the church will hold no liability for injury to persons using the equipment nor damage to property
- The hirer is responsible for ensuring that the base of the castle is not dirty and could mark the floor
- The hirer is responsible for the use of the castle to be monitored by an adult at all times
- The castle is not used by adults (except to walk on to help children)

For information the hire company will normally ask whether the ceiling is higher than 11.5 FT - our Main Hall meets these requirements.
